OBJECTIVE

Proactive and reliable full-stack engineer with a broad web application development skill set. Has been working on various products and clients, from solving enterprise-grade problems to launching new applications for startups. Involves leading technical teams by creating an accessible development environment, fixing technical debts, enforcing best practices in teams, and mentoring developers.

EXPERIENCE

Nifti.com
Apr 2017 - May 2018
Front-end Engineer

- Created reusable D3.js charts using Raphael.js to draw SVG on browsers.
- Handled responsive design layouts for views.
- Implemented reusable components for UX using jQuery.
- Created an xQuery Selector generator from an HTML Element DOMNode.
- Created a Pop CSS editor for elements.

WhoaStork
May 2020 - Jul 2021
Front-end Engineer

- Created the admin application of the web store in React.
- Replaced Redux with Apollo Client for GraphQL against a Ruby back-end.
- Created a HOC architecture to reuse common GraphQL functionality for listing and filtering.
- Created our own custom UI library with styled components.
- Used HOC for form manipulation.

Globali
Nov 2018 - Feb 2020
Full-stack JavaScript Engineer

- Created a new front-end app based on React and Redux.
- Added a Hot module replacement plugin to Webpack.
- Worked with legacy code on the server side, able to understand the principles behind it and make it work again.

luckycloud.de
May 2021 - Sep 2023
Full Stack Developer

- Led the redesign of the entire React.js frontend to align with updated design standards
- Implemented new features, resolved bugs in the backend, and achieved a 15% performance boost through strategic workflow and structural optimizations
- Successfully built 15+ server APIs for enhanced web and desktop application communication
- Improved application performance by 25% by implementing caching techniques and optimizing SQL queries
- Contributed to the "Seafire-Haiwen" open-source project

EDUCATION

Braunschweig, Germany
